

Y2 Spring 2021

Welcome to our Spring Term in Year 2! For now, it will be a bit different to a normal Spring Term, but hopefully we will all see each other again. For the children working at home, each Monday, a timetable for the week will go onto the General channel. Every morning at least one lesson will go into the subject channel, with the rest of the lessons being added during the day.

Whether learning at home or at school, each day should usually go as follows:

Reading

This could be reading your own book or reading/enjoying a book together. Please read Book Bag books, your own books, picture books, comics/magazines...anything! Remember that you can access books on Oxford Owl using tatworth2 as the login and password.

Phonics/Literacy & Language

You will need to use the books and booklets that you collected from school during the first week of term. Please find the videos and tasks for your colour group in the Phonics Team each day.

Spellings

Words will be set for every child on Spellingframe each week (running from Monday to Saturday). Please write the weekly list into your red spelling book as normal at the start of the week. Each day, write the list out again and play some of the games for your word list on Spellingframe. At the end of the week, please complete the test.

English

This term we will be writing information sentences about London. We will focus on checking that our sentences have a subject (I, they, the Queen, Tower Bridge) and a verb (visited, are, lives, has) and that we have used a capital letter at the start of a proper noun (person or place). We will start learning about adjectives (words that describe nouns) and use them to add more detail to our writing. We will start learning about how to use apostrophes for contraction (I am → I'm).

Each week we will be completing two reading comprehension lessons from our class book, Fantastic Mr Fox. Please try and keep up with the chapters we are reading each week and try not to read ahead yet! (we know it is tempting to!)

Maths

We have started the term learning about money. Then we will move on to multiplication and division, which will focus on multiplying and dividing by 2, 5 and 10. We will learn about 2D and 3D shapes and start understanding simple fractions.

Each lesson end with a mental maths game/activity.

Other subjects

Science
PE
Music
PSHE
RE

1st half term

Habitats

Relationships with others

Christianity – salvation and forgiveness

2nd half term

Plants

Fitness and multi-skills

Tempo and Pulse

Respecting differences

Thank you for your support.
